New title of the Manuscript:	Assessment of a Dazel-Kit (fluconazole 150 mg, azithromycin 1 gm, secnidazole 1 g two tablets) for Syndromic Management of Abnormal Vaginal Discharge in Women of Kazakhstan
Type of Article:	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>here are my comments.</p> <ol style="list-style-type: none"> 1. Throughout the paper, the words Vaginal Discharge are capitalized and they should not be. 2. May times in the paper it refers to patient and her partners. Not all patients had more than one partner; therefore it should be patient and her partner(s). This is grammatically correct. 3. Line 33: should read because of an infection. Delete "of the vaginal and/or cervical infection". 4. Line 35 - the word vaginitis should be replaced with vaginal issue as bacterial vaginosis is not an "Itis" but a syndrome. 5. Line 40 - Not all untreated vaginitis can results in pelvic inflammatory disease - e.g. candidiasis does not. Needs correcting. 	<ol style="list-style-type: none"> 1. Correction done as suggested 2. Correction done as suggested 3. Correction done as suggested 4. Correction done as suggested 5. Added "most of the untreated"
