SDI Review Form 1.6

	herbarium for authentication and preservation. 4. Line 169-170. The author clearly states that this study was done previously in the same country. Why was it necessary to repeat this study without exploring areas not previously studied? A reference (No.10) to confirm this is given. The study area is the same; Muheza. A justification should be provided. A similar study in the same area has been conducted before. The question is was a repeat study necessary as it may raise issues of plagiarism.	This study improved further knowledge by innovative study on concentration of the essential oil on human skin (amount of essential oil per skin surface area) that confers the herein claimed percentage protection at various concentrations of the essential oil within the tested concentration (dose) range; the previous one studied formulations
