SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Considerably interesting work, dealing with misconceptions on such a not well known pathology. I consider the paper should show data in a more clear way since most items are exemplified with one case but no data of overall cases are available (line169: <i>a theatre nurse</i>; line 182 <i>a nurse</i> ; line 211 <i>a patient</i>; line 222 <i>a nurs</i>) ; or more imprecise even: line 240 <i>a number of patients</i>. This should be rewritten and shown in a clear way.	Thank you for this feedback. This paper is qualitative in nature and those lines indicated had quotes from the participants. This is typically, a qualitative research paradigm It is unlikely that it can be done in another way since we are to report on what the participants told us.
<u>Minor</u> REVISION comments	Line 14: Acholi should be clearly defined as a tribe, region, place o whatever it is since in line 95 seems to be a tribe.	Acholi is one of the tribes in Uganda, occupying the northern part of country where the study was conducted. Thank you for your fair comments
<u>Optional/General</u> comments
