Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have to a large extent revised the manuscript based on comments More over, this curious phenomenon needs further investigation and the paper may stimulate new researchers to carry out further work However, the additional remark that consumption of alcohol results in inhibitory effect on cells should be deleted as this has no scientific ground	Thanks we also uphold this view, this work will open new facets for research in the field We absolutely agreed with your suggestion regarding effect of alcoholism to inhibitory or cytotoxicity seen in 45 volunteer's serum to Neuroblastoma, our hypothesis is just a mere speculation without scientific basis and hereby accept to delete that aspect in our discussion on the article line 137 to 142 is shaded red meaning/instructing its deletion from the manuscript
