

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014_IJTDH_14660
Title of the Manuscript:	ANTI PLASMODIAL ACTIVITY OF BEE STING IN <i>PLASMODIUM BERGHEI</i> INFECTED MICE
Type of Article	Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Line 6. its Line 7. Separate <i>berghei</i> from infected Line 9. Separate <i>berghei</i> from strain Please separate these words as indicated in the content in line 20 – 22, 32, 34, 35 43, 44, 48-50, 66, 71, 88, 98-99, 105, 128, 150, 173-176, 189-190, 196-197, 237-239, 242, 246-248, 253, 257, 258. Line 63. Correct sensit<u>i</u>ve to sensit<u>i</u>ve and effect the corrections in line 77-81, 95, 143-144, 159, 198, 227, 249. Line 95-96 is Average % parasitemia of infected untreated group - Average % parasitemia group of infected treated divided by Average parasitemia of infected untreated group x 100. This should be written correctly. Figure 1. error bars should be indicated on the graph. Similar graph should be shown for suppressive treatment. Table 1. Similar table should be shown for curative treatment .These correction were pointed but not effected, and would be good to make these correction if these values were fabricated. Please arrange the reference in line 240-242, 252-253.	Noted and corrected Word merge not agreed. The article is type on Microsoft word 2010. So if open or print on word 2003-2007, some word will be merge together (such as <i>berghei</i> infected). Line 63 noted and corrected. Line 95 – 96 noted and corrected. Figure 1 error bars not agreed because this reading is subjected to descriptive standard deviation not standard error In malaria research, suppressive treatment test is always presented in table not figure and curative treatment test is always presented in figure not table The reference is noted and corrected.
