

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_20420
Title of the Manuscript:	H1N1 – One Year Follow Up Study
Type of Article:	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Major corrections requested were made, but some do not. The sample size is too small and the discussion is not strong enough. Even though some hypotheses were raised, the data made little contribution to conclude something.	Reviewer – many thanks the important comments. The comment of this reviewer was very vague - he did not specify any changes and if so what changes. The changes according to the reviewer have been made. I tried to make most of the major changes as per the reviewers suggestion. One of the suggestions was to perform a new study – we are in the process of doing a nationwide study with H1N1 patient with larger sample size. If there is any other recommended changes please let me know Sample size - we only had 12 patients with H1N1 infection - this is a case series with small sample size in this pilot study.
