PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
GENERAL COMMENTS -The reviewed article still showed multiple typographical and technical errors despite the claim of the authors to have carefully adhered to previous comments. The authors would have performed better by using the spelling check on the computer which would have clearly identified most of these errors. Line 7- change amongst to among Line 12- insert space between 1st and September Line 17- remove the full stop and "A", insert "with' to join the two sentences. Line 21- insert space before years Line 22- insert space between of and 5.8 years Line 22- author to explain the meaning of (SD 4,5 years). Did you intend to put a full stop instead of comma? Line 23- space between 209 and the bracket Line 57- space after "had" Line 71- space between 2013 and "at" Line 83- what is the meaning of 9.800refugees? remove full stop, insert space before refugees Line 85-Insert space after [16]. Line 112- insert space after [18]. Line 271- supply English interpretation of the name of the organization given in French. Tables Generally inconsistent with some previous errors identified left uncorrected by authors. -sometimes authors represented 6 as 06 but later insert 8 instead of 08 to ensure uniformity Table I- change "years of living in the camp [years]" to 'Duration of stay in the camp [years]' Table II- the first row after number of sexual partners was left blank. Do you mean to put "Yes"? Columns with no value should be represented as 0 [zero] instead of a dash. Change "sti" in footnote to STI. Table III- subheadings were not in bold fonts as in other previous tables. Table IV- Authors did not heed previous correction to replace commas with full stop for numbers. References -Gross irregularities- authors used "and" between last two authors of some references and a comma for others. -no need for month of publication e.g. "august". -spaces were not inserted where needed on many instances. -why was the volume on line 294 in bold font while others were not? -Why full stops after initials followed by comma for some references? -why year of publication after name of authors on line 343?
