PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The author has done a good job in overall description of study but a few points are left unanswered. The author has mentioned about the importance of management in introduction but no results of management were described in study. The study mentions the conclusion of only severe malaria patient at one place and at other it mentions just	This study is based on the patients hospitalized at Dept. of Internal Medicine, VSS Institute of Medical Sciences and Research. It is the referral centre of around 12 districts of western Odisha and few districts of eastern Chhattisgarh. This data is based on the patients with severe <i>P falciparum</i> malaria from different districts.

SDI Review Form 1.6

	patients positive for falciparum .	About the management of patients, we have deleted the sentence from the introduction as the importance of the study is only to describe the spectrum of severe <i>P. falciparum malaria</i> in a referral centre of a malaria endemic region.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
