

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014_IJTDH_11595
Title of the Manuscript:	NASOPHARYNGEAL CARRIAGE AND ANTIMICROBIAL SUSCEPTIBILITY OF STREPTOCOCCUS PNEUMONIAE, IN CHILDREN UNDER FIVE YEARS AT MBARARA REGIONAL REFERRAL HOSPITAL, UGANDA

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The MS still needs to be checked for grammatically. The names of the microorganisms should be written due to Linne system. <i>Streptococcus pneumoniae</i> is not written in a suitable form in the heading of the MS and in material method section. And also the microorganism names should be written in Italic font. <i>Viridans streptococci</i> is the term better to use. In microbiological taxonomy it is not used as Streptococcus viridans. Antimicrobial susceptibility for penicillin is performed with oxacillin, penicillin disc is not necessary for penicillin susceptibility. Authors should check discs according to CLSI recommendations. The ATCC strain numbered 49456 is <i>Streptococcus mitis</i> not S.viridan. Although it was indicated that Ciprofloxacin is not recommended by CLSI, the MS still include comments about ciprofloxacin.
