SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Prevalence rates of urinary schistosomiasis in Amaeffia Comm. Prim. School, Igbeagu Central School and Junction Pri. School were lower than in other areas. The authors suggested that the lower prevalence in the areas might result from availability of potable water and boreholes water. However, they did not compare the water source rates among these schools. These comparisons should be done. 2. A reference style the authors used is inappropriate for this journal. Please check the general guideline for authors of this journal and revise them carefully.	The reason for such has also been stated
<u>Minor</u> REVISION comments	3. An abstract should be written using constructive form involving sub-sections as follows: aim, study design, place and duration of study, methodology, results and conclusion. 4. line 62: A space should be added between "STUDY" and "AREA"	The abstract has been re-structured and amended. Space has also been given
<u>Optional/General</u> comments
