

SDI Review Form 1.6

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_19834
Title of the Manuscript:	PRIMARY SQUAMOUS CELL CARCINOMA OF GALL BLADDER – A CASE REPORT
Type of the Article	Case Study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Abstract It is not recommended to use abbreviations (CECT) in abstract. What is "element of cholangitis"? Would it be manifestations of cholangitis? What the authors consider a "radical cholecystectomy"? Introduction Although the incidence of neoplasia is variable in published reports, it is strange the authors put as minimal incidence zero (0 -12.7%). I suggest the authors write that the incidence may reach 12.7% of tumors of the gallbladder. Case report The authors use abbreviations, but do not explain their meaning (SGOT, SGPT, MRI, CECT, HMWCK). The phrase "Immunohistochemical stain (HMWCK) was equivocal. (Figures 3 & 4) " is confusing. What doses of chemotherapy in the adjuvant treatment? What is a "regular follow-up"? It is missing the arrows in Figures 1 and 2 to highlight the information of the respective legends. In Figure 3, the legend does not explain what characterizes the finding of squamous carcinoma. Figure 4 is unnecessary as it does not bring important information to the case.	Agreed with reviewer feedback and manuscript is corrected & highlighted. Manuscript is corrected & highlighted. Manuscript is corrected & highlighted.
<u>Minor</u> REVISION comments	Spell check should be performed to standardize the use of uppercase and lowercase letters in the middle of phrases, and symbols such as "&". The English language also needs to be revised (lymph nodes instead of "nodes"; samples instead of "bits", etc.).	Manuscript is corrected & highlighted.
<u>Optional/General</u> comments	This manuscript is well written and describes rare case of primary squamous cell carcinoma of the gall bladder. The subject is relevant for its rarity and endowed with scientific value.
