

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_23447
Title of the Manuscript:	PERSPECTIVES ON COMMUNITY TIBERCULOSIS CARE IN NIGERIA
Type of Article	Review papers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The revised version of the paper is much improved and addresses most of my comments. I would ask that the authors spend a little more time in the methods section describing how many published works they reviewed, how these were selected, and what biases may have been introduced by this process. Also, since this is primarily a review of existing documents and a perspectives piece, the authors may want to consider changing the title to state: "Perspectives on Community Tuberculosis in Nigeria"	Thanks for the insightful review. I have changed the topic as recommended. I have stated the number of documents reviewed while mentioning that they were gotten from a literature search from the internet. I also stated the various kinds of documents that were reviewed. I declared in the conclusion about the dearth of documents on Community Tuberculosis in Nigeria. But I noted that the few ones seen have been able to make a case for CTBC. However, I will appreciate more assistance on this methods section. Please feel free to give your take and effect so far it makes the work better.
