PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1- This is a study of age dependent incidence of female breast cancer. 2- Figures and tables are well shaped. 3- English language must be edited by native English speaker. 4- Line 54-61; the incidence of malignancy is high among urbanized area patients compared with rural patients. Environmental pollution is one of the probably the major reason of this. This is the reason not only for breast cancer or cancers but for all disease types.(Minerva Chir. 2014 Jun;69(3):147-53.) (Med Sci Monit. 2014 Aug 4;20:1369-75. doi: 10.12659/MSM.890804.)	1 Agreed:Since it is population based we used the age specific incidence. Thanks. 3 Agreed.English is our second language. 4 Agreed:The omission of environmental pollution as one of the causes of urban rural variation of breast cancer has been corrected.
