

Editors Comments:

I reviewed all documents of the article, comments of reviewers and feedback and final manuscript. But there is a publication for the same authors, the same sample con aim in Hepatitis B. Anaedobe CG, Fowotade A, Omoruyi CE, Bakare RA. Prevalence, sociodemographic features and risk factors of Hepatitis B virus infection among pregnant women in Southwestern Nigeria. Pan Afr Med J 2015;20 doi: 10.11604/pamj.2015.20.406.6206
MAYbe the authors should erase all comments about Hepatitis B in this article.

Authors Feedback:

Thank you for the review and recommendation. I have revised the manuscript as recommended and have deleted all comments on Hepatitis B virus in this article. The details are below:

TITLE: Hepatitis C virus infection among pregnant women in Ibadan, Nigeria: Prevalence, correlates and co-infection with HIV.

Coinfection with HBV has been removed as can be seen on line 3

ABSTRACT: All comments on HBV has been erased in lines 6,9,22,24,28,29,30,32

INTRODUCTION: Comments on HBV deleted in lines 45,51,61,63-65,85

MATERIALS AND METHODS: Corrections made under laboratory investigation, in lines 121,125,126-129.

Entire protocol for HBV DNA extraction, amplification and detection has been deleted (Formerly on lines 150-167)

RESULTS: Corrections made on lines 177, 180-182

Table 3 –Showing OD values of HBVELISA positive samples has been removed

Figure 1- Showing Gel electrophoresis on PCR product for the HBV DNA has been removed

The numbering of the tables has been adjusted accordingly in lines 203,210,211,215,220,226

DISCUSSION: All sentences on HBV in the body of the discussion have been erased. Other comments on HBV erased can be seen on lines 246-250,318,320-321,336,357,360,371

REFERENCES: Former reference numbers 27-32 has been remove (on HBV comments in the discussion) and other reference numbers adjusted accordingly
