SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This study involved aspects of Epidemiology, Microbiology and hospital infection control. The manuscript is regular and important for microbiology researchers and Publics Health and Hospital managers, although there are some errors to be corrected and suggestions to be done. 1. One of the keywords used do not follow any index descriptors in public health, as BIREME, MeSH, NLM or UMLS (eg. "water logging"), and it should be changed. 2. The title of the manuscript could add the country of study (Ex: "PREVALENCE OF LEPTOSPIROSIS INFECTIONS AMONG ACUTE FEBRILE PATIENTS IN LAKHIMPUR AND DHEMAJI DISTRICTS, INDIA") 3. The topic "Materials and Methods" should get one more item (eg. "Ethical consideration"). 4. The abstract has to be completely revised.	1. The keyword "water logging" changed as per instruction. 2. The Country name added. 3. Ethical Consideration mentioned. 4. Abstract tried to revise.
<u>Minor</u> REVISION comments	1. I suggest increasing the text of the discussion and put some new items like: a)limitations of the study; b)Other researches <u>OR</u> introduce one more item like Conclusions.	Conclusion added.
<u>Optional/General</u> comments
