SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Cryptococcus neoformans is categorized as "yeast-looking" fungus but taxonomically is a Fungi. I recommend not to mix terminology. Please clarify on text the meaning of abbreviations, for example for PTB, write: Pulmonary Tuberculosis (PTB) – only once will do to help the reader understand all the abbreviations in the text.	Thanks, this has been corrected in the test.
<u>Minor</u> REVISION comments	Please double-check spelling and grammar in medical terms.	All done to the best of our knowledge
<u>Optional/General</u> comments	Excellent material, has a lot of potential. I STRONGLY RECOMMEND TO ADD A SUBTITLE OF CONCLUSIONS AND RECOMMENDATIONS at the end of the text. After your experience with this case, what would you recommend to your colleagues treating HIV patients with PTB?	Conclusions added as a subtitle Recommendations made already in paragraph 8 of Discussion session.
