SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In the abstract, the second line should read 'needs' and not 'need'. The statements on lines 41-44 of the introduction need to be referenced appropriately. Since Vancouver reference style s in use, 'Idowu et al' should not appear in the text. The third paragraph may as well be moved to the discussion. Method: the authors should briefly explain the stages in the multi-stage sampling technique. In lines. The groupings stated in lines 113-116, are not in agreement with those mentioned in the abstract.	All corrections done have been highlighted in yellow This has been corrected Idowu et al has been replaced with appropriate wordings The third paragraph has been moved to discussion. The Grouping have been adjusted in the Abstract
<u>Minor</u> REVISION comments	Usually when logistic regression is carried out, an adjusted odds ratio is obtained and reported. Kindly note this. The conclusion is not very clear. Authors should kindly revise the references, according to the journal style.	Noted. Thank you The conclusion has been revised References have been amended in line with journal styles.
<u>Optional/General</u> comments	Good study, good manuscript.
