SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments		Authors sincerely thank the reviewer for the comments.
Minor REVISION comments	This is a paper with important data for those interested in the epidemiology and/or control programs of urinary schistosomiasis in an African area. However, in my opinion, it was not clear if the examined population sample was chosen according a method assuring the statistically representation of the general population of that region. So, I believe it is important to clarify this aspect before considering the text fit to be published.	We agree that it was necessary to show prove of the representativity of the sample. To this effect, we have added sample size determination in the section "study population".
Optional/General comments
