

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_26701
Title of the Manuscript:	DIARRHEA DISEASE: A CONCERN FOR DEVELOPING COUNTRIES
Type of Article:	Mini Review paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have improved this MS by including suggested topics missing in the first review. I took the liberty of adding a few comments, I personally believe the MS could be improved by offering numbers and/or percentages at key points, for academic reasons, such as those given as examples. Write references according to journal specifications. The Conclusions do not reflect the contents of the MS.	I appreciate reviewer contributions and comments. Necessary corrections have been made. Meanwhile author thought it right that the issue of “what can be done to improve their nutritional status, reduce days of diarrhea and prevent early death?” is better discussed under call for action. This was part of the previous reviewed manuscript however more information’s have been added.
