

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_27673
Title of the Manuscript:	Perception, Attitude and Satisfaction of Women with Focused Antenatal Care in Ondo State, Nigeria
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The author made some improvements in some areas but also added a lot of new information which was not summarised and not well thought through, this is most apparent on the theoretical framework, and the crude reporting of statistical analysis with hypotheses coming from nowhere 2. From my previous remarks, there are still many issues not well addressed: measurements especially the use and interpretation of Likert scale, the comparison of findings between the compared groups is very scarce in the results, discussion is still a repeat of results and not a discussion of results, the conclusions and recommendations still not line with the study aim 3. My strong recommendation to the author is to read many other publish articles and learn on the way authors write their results, discussion and conclusion sections. There is still a lot room for improvement.	The aspect of the statistics has been addressed and modified The discussion has been modified to ensure a repeat of results in discussion
