PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The title of the paper <i>“IMPACT OF REFUGEES AND INTERNALLY DISPLACED PERSONS ON INTERNATIONAL HEALTH”</i> is not related to the main content. Respectfully, I would recommend to outline the actual IMPACT of immigration in receiving countries. Be specific on diseases, be specific on data (before and after immigration) by calculating incidence and prevalence of each one of those, and then interpret how is that creating an impact. Strict documentation of refugee’s data is being already done and there is valuable material for this paper online (through CDC/IPPA/IOM).	Key diseases have been captured. As per calculation of incidence and prevalence, this is a mini review and a narrative one and does not in any way want to capture that in detail. The aspect covering the distribution of some of the communicable diseases is enough for the scope of this work.
