SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	What is the limitation of this study? Your conclusion should agree with your methodology for example you did not check for other agents of hepatitis in your study and you excluded patients with chronic hepatitis; how then did you conclude that Hepatitis B virus is the commonest cause of chronic hepatitis in Sudan? What is your conclusion on the impact of hepatitis B viral infection on the hematologic parameters of infected individuals? Please clarify the ethical issue: State Ethical clearance received from appropriate authority	-One month was the limitation of the study. -It is logical (I revised this) -Revised - Ethical approval was obtained from Alneelain University ethical committee. Each patient signed an informed written ethical consent (I forget to mention this)
Minor REVISION comments	Abstract: Line 2: Change 'responsible of' to 'responsible for' Line 3: "Change that affect metabolism throughout the body" to "That affect general body metabolism" Introduction: Other typographic and grammatical errors should be corrected. This could not be done in the manuscript because the document is in the pdf format. Page 8: Change 'discution' to 'discussion'	-Done -Revised Done
Optional/General comments		Thank you
