SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	English should be edited by a native English speaker.	The entire document has been revised and the necessary English errors corrected
<u>Minor</u> REVISION comments	In section 3.3, since this is an observational study I do not think one can assert an interaction between parasites but only a correlation.	The authors agreed with the reviewer concerning the assessment of interaction. However, the authors have found it necessary to replace interaction with co-infection of the parasites concerned in the same host (see section 3.3)
<u>Optional/General</u> comments	Important well done study that should be published with minor revisions.
