SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Your Conclusion under Abstract is like Recommendation. We need to know the conclusion of your finding which can be followed by recommendations. Conclusion: <i>We suggest that our observations can be used in remote areas where facilities for specific test are not available or limited by financial constraints or in epidemics.</i> Remove 'Outcomes' from your Keywords	Conclusion: There are certain differences between clinical , hematological and biochemical parameters in malaria and dengue for early diagnosis. We suggest that our observations can be used in remote areas where facilities for specific test are not available or limited by financial constraints or in epidemics. Key Words: Thrombocytopenia, Liver function tests, Kidney function test, Dengue, Malaria, Bleeding tendencies.
Minor REVISION comments	Please describe your study location under <u>Methodology</u>	
Optional/General comments
