SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Line 9: Confirm whether the inmates age included 16 year old, who should have been in Juvenile remand homes. Line 27: Replace the word criminals with in-mates as determining their criminal nature is beyond the scope of this study. Line 168: The Human Flea is not near extinction, nor is it in the list of the endangered species. Please correct the facts. Line 196 onward: Ensure that all the references in the text should be listed here.	
<u>Minor</u> REVISION comments	Lines 16-17: Consider revising the language. The subject matter is unclear. Line 61: Consider deleting "North west region of Cameroon" as it is already described in the area of study. Line 92: Delete "The prevalences were significantly different" as the statistics comparison among the different cell did not seem to have been done. Line 154: replace the word weeping. It doesn't sound appropriate.	
<u>Optional/General</u> comments	This is a very good manuscript. Congratulation for the good work.
