SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There is no citation about the Table 2 in the text. Where are the Figure 1 and 2?? There is only Figure 3?? Line 249: the word "discovered" is pretty much strong in this context. "Found" would be better Line 266: What is meaning of ITNs???	
<u>Minor</u> REVISION comments	It is not an original work but it's very interesting. It shows a different reality of other countries, especially with regard to the prevalence of malaria. It presents clinical aspects that should be remembered in malaria approach.	
<u>Optional/General</u> comments	The statistical analysis is simple but correct. I believe that after the corrections it is a manuscript can be published
