SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	I think it is a fine paper with good methodology. There were a few places such as where the word 'contradicts' is used rather than 'in contrast to' and in the final sentence where one might phrase things more in the lines of this being a process with multiple observations building on knowledge. Future studies may again find contrasting results in different populations and should be done..etc
