SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	*Language & grammatical errors *Introduction: relatively long *Methods: Sample size was wrongly calculated. The unit of analysis is head teachers (not school) & the outcome of interest to be used for sample size calculation is not the % of private schools. Sampling method is wrong & confusing. What is meant by sample random sampling by balloting? What about the validity & reliability of the study tool? *Results: Why the response rate is 95% (360 schools were selected & 360 head teachers responded) Long comments on tables Table 1: merge age group =/=60 with the proceeding group, Delete Hawa ethnicity Table 2: What are the operational definition of correct/incorrect of all variables? *Discussion: Superficial & failed to adequately interpret the findings. MDG are not relevant now, We are in the era of SDG *References: please update the many outdated references	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
