SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	It is a descriptive study about the seroprevalence of CMV IgG in a series of HIV patients, both on and without treatment .	
<u>Minor</u> REVISION comments	Some minor corrections are suggested 1. Abbreviations: HIV abbreviation should be placed in order (line 47 instead 49) 2. No mention is made on what is the purpose or the objective of the study but in the abstract; the authors claim that "This necessitated the present study, etc". It should be also included in the introduction 3. The geographical location with GPS is unnecessary	
<u>Optional/General</u> comments	1. The introduction is very long and I should recommend reducing it
