SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	27 The Authors mentioned the caesarean section is the commonest surgical procedure in sub-Saharan Africa instead of : in obstetrics and gynaecology in sub-Saharan countries/African countries 33 Mention the risk is high, but what is high? and did not mention why. It is because of trial of labour or spontaneous. 39,44 Need to be re-written: Vaginal delivery is the accepted mode of giving birth in our environment.... 56-58 Material and Methods: study site: The Authors made a description which is not correct: Should follow the first sentence with the number of deliveries conducted in a year, full number of beds, antenatal , labour and postnatal Methods: The Authors did not clarify how was the sample taken: A retrospective study was conducted at university teaching Hospital. All cases of HOCS were
