PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Very excellent revision of the paper. Only two revisions need to be done: 1. Page 11 last sentence. This is a run-on sentence with the revised text just being added to the beginning. So please. Stop the sentence beginning “In reference to the secondary outcomes, Clinicians too... at p=0.038). (also the word Clinicians should not be capitalized). Begin the next sentence and revise the wording to something like “The duration of CDI was also longer in the immunocompromised group compared to the non-cimmunocompromised group (10.1 days...)” 2. Page 13, 1st paragraph of the Discussion. Please revise the phrase “ that CDI presented remarkably” to “...that CDI is not trivial in our locality, ...” This is better English. Otherwise, great paper! Congratulations!
