| <p>Table 2: Each category should be analysed on Yes or No basis so that we can know the proportion of those aware or not</p> <p>In the discussion, lines 316-385 have no reference. All the discussion within these lines are more or less like repeating and expatiating on what has already been said in the result. The author should look for literatures to compare and contrast the study findings with.</p> <p>Apart from recall bias, other possible biases were not mentioned as well as measures in protecting such biases</p> <p>All the issues stated above must be properly addressed before publication in a reputable journal like this</p> |                                                 |
