

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_28019
Title of the Manuscript:	IMPACT OF REFUGEES AND INTERNALLY DISPLACED PERSONS ON INTERNATIONAL HEALTH
Type of the Article	Minireview paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Please revise section 3.4; data is not concise and might be confusing, especially where you mention Class A/B conditions. Who uses that classification? Eligibility of what? Make sure that readers understand everything to perfection. Class A is an inadmissible condition of public health significance that might be an infectious disease or a mental disorder with associated harmful behaviour. Class B means that immigrant needs follow up after arrival – for refugees there is a travel sheet with special requirements that differs completely from these classifications. For Tuberculosis there are three different classifications B1, B2, B3 depending on the type of disease found, but exclusively applies for the United States.
