

Editor's Comment:

This manuscript still has some rooms to be improved.

I would like to invite the authors revise this manuscript according to my following suggestions.

1. Page 1, Please change the title to "NUTRITIONAL STATUS OF CHILDREN WITH CONGENITAL HEART DISEASES AT A UNIVERSITY TEACHING HOSPITAL, NORTH-WESTERN NIGERIA."
2. Page 1, Abstract, Methodology: A cross-sectional descriptive study from November 2014 to April 2017. It's not a complete sentence. Change to "A cross-sectional descriptive study was conducted from November 2014 to April 2017."
3. Page 2, Last paragraph, Objective.....Please revise as "This study was designed to determine the prevalence of underweight, wasting, stunting and thinness among children with congenital heart disease, and to assess the relationship of nutritional status with underlying cardiac diagnosis and social class."
4. Page 3, Study design: change (1st November 2014 to April 2017) to (November 2014 to April 2017).
5. Page 8, Table II, change %tage to " percentage (%)".
6. Page 12, Table VII should be Table VIII.
7. Page 15, Use several sentences, add a conclusion at the end of discussion.

Once the authors complete the above revision, I would reconsider the potential of acceptance for publication.
