

**Editor's Comments:**

Please find the corrected version of the revised MS\_IJTDH\_31448.

The authors had done a satisfactory revision as they had shown in yellow highlight.

However, I have done further improvement by completing the required references and arranging them; I have also made other minor corrections shown as green highlight in the attached file.

**Please allow the authors to see the final changes and give their feedback ASAP, so that they can understand how these changes have made the manuscript acceptable for publication. I would like to go over their feedback.**

**Decision: This is a very important manuscript and is to be published to share the important findings with the scientific community.**
