

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_25693
Title of the Manuscript:	Some haematological parameters and immunoglobulin levels in mycobacterium tuberculosis infected patients in Benin city, Southern Nigeria
Type of Article:	Original research paper

PART 2:

FINAL EVALUATOR S comments on revised paper (if any)	Authors response to final evaluator s comments
1. It is really very disturbing that clinicians not handled properly treatment, should be clarified in the manuscript. It would also be relevant that the authors comment on about this with clinicians. 2. The foot tables are very long, in Table 1 and 2, it is better to note the significance of the abbreviations used and the reference values of the items presented. (It was not corrected). 3. I suggest removing 4-6 tables, just mention the data in the text and note in brackets (data not shown). (It was not corrected). 4. The authors did not update even a single reference to 2014-2016. (It was not corrected).	We have noted the reviewers comment on the treatment regimen and have deleted them to enable us seek further clarification. We acknowledge the reviewer for his/her comments, but what exactly he wants us to do is not clear. Meanwhile evidence of publication of tables presented in similar way abounds in some other journals. However we will be glad to get clarifications from the reviewer. Tables 4-6 has been removed and data mentioned in text. Some current literatures have been included and highlighted in the reference section.
