SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	**Ms_IJTDH_27212**
Title of the Manuscript:	**Prognostic value of Serum Estrogen, Cortisol, Calcium and Alkaline Phosphatase Activity in Pre and Postmenopausal HIV Women at Nnewi, Nigeria**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
The revised manuscript has been substantially improved when compared to the original submission. Congratulations. However it stills needs some minor improvements in terms of coherence of results description and p-values presentation. For example: . in the abstract, **PTH** was not considered when comparing HIV postmenopausal women against their controls. The same for **Ca^{2+}** when comparing pre and postmenopausal HIV women; . **Ca^{2+}**is significantly different between pre and postmenopausal HIV women in table 3 but not considered as such in the text of the results section 3.3; . the numeric value of **vitamin D** in the text of results section 3.3 is not the same as presented in Table 3 (I think there was a confusion with FSH value); . in conclusion section, **PTH** (lower and not higher) is wrongly mentioned when comparing postmenopausal HIV women with their controls and **alkaline phosphatase** is wrongly mentioned when comparing post to premenopausal HIV women (it is not significantly different). . p- values presented along the text do not match those in Tables 1, 2 and 3. . What do the p- and t-values of the Tables 1, 2 and 3 mean? It is not clear.	**Thanks a lot.** **The correction has been effected.** **Is done.** **The correction has been done.** **It has been corrected too.** **All the corrections have been revised.** **Student independent t- test was used for the statistical analysis.**
