Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1) Author did not provide data to support (i) Overall Respondents' knowledge (ii) Overall Respondents' level of satisfaction. These should be expunged if the data is not available. 2) In Figure 1, author should label the X & Y axis 3) Move 'study limitations' to after 'Implications of the findings' 4) Revise the References, using number 1, as reviewed, as example in citing Journal articles	Thanks for your comments, same have been addressed as follows: 1) There were six statements under Respondents' knowledge. To a statement, "Yes" answer was scored "1" as against "0" for a "No" answer. Therefore, maximum obtainable score per participant was "6" (100%). Overall Respondents' knowledge was determined using an average of "3". Participants who scored less than < 3 (< 50%) were categorised as having "Poor Knowledge", while those who scored ≥ 3 (≥ 50) were categorized as having "High Knowledge" of NHIS program. Likewise there were "8" statements under Respondents' Satisfaction." "Yes" answer to a statement was scored "1" as against "0" for a "No" answer. Maximum obtainable score per a participant was "8". Participants with score of < 4 (< 50%) were categorized as having "Low Satisfaction" while, those with score of ≥ 4 were categorized as having "High Satisfaction". Data to support this have been included in the manuscript. 2) X & Y axis in figure 1 have been labelled 3) "Study Limitation" has been moved to after "Implications of the Findings" 4) References of the journal articles have been revised. Thank you.
