PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Indicate what the remaining 10% of the population used as water source. Result does not tally with comment	The error has been corrected as follows: 58% (58/100) used both water sources. 23% (23/100) used pipe-borne water alone; and 19% (19/100) used river water only.
Minor REVISION comments	Possible observed trends of infection Consider compressing the 2 tables together	The authors will like to keep the tables as they are. Results appear clearer
Optional/General comments	It is a good report and highly important to be reassessing endermic areas.	CORRECTIONS HAVE BEEN HIGHLIGHTED TURQUOISE COLOUR
