SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This is a common & readily known topic.	
<u>Minor</u> REVISION comments	Line 51 & 52 – there is gap. The author mentioned Eustachian tube as the cornerstone of the causes and yet jump to the other factors of URTI and allergy. Please described/elaborate on the ET dysfunction. Line 93 – 226 is not correctly mentioned. Line 128 – the sentence is not understandable.	I have attempted to fill in the gap by adding some more information about the ET in children I have tried to explain these portions better
<u>Optional/General</u> comments	This is common findings/risk factors in the majority of OME patients.	Many thanks to the reviewer i appreciate all the corrections
