SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	1. Attention should be given to the scientific names of parasites especially <i>E. histolytica</i> 2. Its advised that not too old reference should be used 3. Some sentences need to be properly put in place using MS word. In general, Adobe Acrobat Reader DC was used to assess the document and comments on the pages were saved for easy understanding.	<i>E. histolytica</i> corrected to <i>E. histolytica/dispar</i> since there was no molecular analysis to differentiate between <i>E. histolytica</i> and <i>E. dispar</i>. All corrected accordingly Reference 28 is not old since its just 8 years old because the reference is considered old when it is more than 10 years old. However the biggest percentage of the references cited are current. The wording is properly put in place with MS word but get distorted when attaching the document on the E-mail. I don't know why?. The document has been proof read.
Optional/General comments	The manuscript can be accepted but its advised that above comments is attended to improve the paper. Thanks	All comments and suggestions have been attended to.
