SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	• Write the objective of the study here. • what are the motivations for this study • What are the gaps which you are trying to fill? • Besides this, there are many studs conducted in Africa to identify factors affecting malaria. So, try to summarize some of the studies. Eg. Ayele et al. 2012, 13, 14 etc. • Discuss the sampling and survey design here or refer to a document which explains this procedure • Explain how the prevalence in the table has been calculated. • Please explain your result in comparison to previous studies.	All corrections have been effected according to reviewer's comments This has been inputted and can be seen in line This has been corrected and can be seen at Materials and Methods Section. Generally the prevalence was calculated using the formula : Number of infected individuals / number of individuals sampled (sample population) X 100. This was automatically calculated by the software (SPSS version 23) which can be found in the data analysis section.
<u>Optional/General</u> comments
