SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment Research work contributed to knowledge.	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Topic: Authors need to review the topic; I suggest (Antibiotic Associated Diarrheal with Special Reference to Clostridium difficile). Abstract: Consider manuscript. Literature review: Consider manuscript. Methodology: Consider manuscript. Results: Authors need to review topic because aetiology has to do with isolates and the isolated organisms are normal flora of gastrointestinal tract. Also, antimicrobial agents should be presented in percentage and various wards mentioned in results were not part of methodology in sample collection. The presentations contain too many grammatical errors authors need to review it.	- Topic name changed as suggested by the reviewer. - Correction done in Abstract - Detailed data was entered in Microsoft Excel sheet. Statistical analysis was done with help of it. - Correction done in Literature review - Correction done in Methodology - Results : - Correction done for antimicrobial agents . Presented in form of percentage. - Methodology in sample collection corrected . Samples were collected from indoor patients belonging to different faculties and also from outdoor patients. - Grammatical error corrected
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Consider yellow tinted for corrections and red printed texts for suggested corrections.	Changes done as per the suggestions.
