FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Congratulations for the improvements in the manuscript. For improve the manuscript I suggest to describe the initials OOPS first time that it's cited. It's necessary to present the odds ratio for all variables categories, specifying the reference category (Table 3).	Thank you for the feedback. I have described out – of – pocket spending (OOPS) on healthcare. The unadjusted odds ratio could only be presented for the variables that had two groups or categories. This was not possible for other variables that had more than two groups like socio – economic status index, marital status, tribe etc.
