PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In these study found that some clinical factors as well as support membership influence QoL and the extent depends on domains.and in other persons stakeholders (Clients, Health workers, Government and Non-Governmental Organizations) should put these factors, domains and support group membership in perspective in planning(PSC) targeted at continued counselling and health education on the role of care of HIV clients. Health workers should implement peer support therapy/counselling participation in support group activities on QoL as well as sustained good treatment and follow up of clients by clinicians so that PLWHA do not develop symptoms.	Change effected. Page 9,10,,11 The changes are highlighted in yellowand green in the text.
Minor REVISION comments		
Optional/General comments
