SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Authors have to describe the questionnaire in detail. Authors have to specify in the methodology section the variables of the model. Authors have to comment the model results shown in table 3. In the discussion section authors should describe in detail and discuss the model results, while the current content of the discussion section should be moved in the conclusive section.	A further description of the questionnaire have been made between line 72 -75 (Highlighted in yellow). Variables included in the model have been specified in line 81 and 82. Comments have been made on the model result in Table 3. The adjusted odds ratio (AOR) and Confidence Interval (CI) of the significant factors were reported. I.e Line 119-124. The result of the model have been further clarified in line 155 to 160. The discussion of the two significant risk factors (locations and previous license suspension) of RTC in this study were also discussed as well.
Minor REVISION comments	Authors should add a brief description of the structure of the paper at the end of introduction. I would remove figure 1.	Figure 1 has been removed and the sub-section 3.3 (line 116-117) has been modified to include the prevalence of RTC.
Optional/General comments
