PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This article have new data about HFMD and nail changes from North India so it will be accept after minor revision. I evaluate the article about HFMD.	Thankyou for giving due consideration to my article.
Minor REVISION comments	1. The author must add the "prospective study" phrase to abstract methods section. 2. Nail changes are not rare complication. In a study from Turkey showed that nail changes were %25 of total case. This article must be added to references section. https://www.journalagent.com/turkderm/pdfs/TURKDERM_51_2_41_45%5BA%5D.pdf 3. Material and Methods: How many patients were excluded from study. This number must be add. Information about ethical approval should be added. 4. Line 107: before the however written "1". 1 is references or not? 5. Discussion section is well written. This article should be used in discussion section. https://www.journalagent.com/turkderm/pdfs/TURKDERM_51_2_41_45%5BA%5D.pdf 6. "ist case" phrase was written In Figure 1. What does this mean?	1. I have added the- 'prospective study' in the abstract as well as materials in the text. 2. Thank you for bringing this recent and very nice article to my knowledge. I have incorporated the data from this article both in the discussion and reference section. 3. Two children who came with onychomadesis and nephrotic syndrome were excluded from the study. Information about ethical approval has been added. 4. "1" has been removed. Printing error. 5. In discussion this article has been incorporated. 6. Ist case in figure 1 refers to the first case of HMDF that was reported from the hospital. As this article pertains specifically to the nail changes after HMDF hence more details about the HMDF have not been touched in this article, only relevant portions are written.
Optional/General comments
