

Editor's Comment:

The corrections advised:

1. In abstract; all 'T.capitis' phrases should be corrected as 'Tinea capitis' and no other abbreviations.
 2. In abstract; results section; in the 3rd line 'with T.capitis' should be omitted.
 3. Keywords:....., Preschool children,...
 4. Introduction; First line; 'Tinea capitis (T.capitis), also....'
 5. Introduction; last paragraph; line 4; '...not known. This study...'
 6. Results; 2nd paragraph; 3rd line; '...49 years old patient.' (should be discarded)
 7. Discussion; 1st paragraph; 5th line; '...children less than 13...'
 8. Discussion; 2nd paragraph; 3rd line; '...other hand, kerion...'
 9. Discussion; 2nd paragraph; 4th line; '...the favus type...'
 10. Discussion; 2nd paragraph; 4th line; '...and that is why T.....isolated' should be discarded.
- Discussion; last paragraph; ' In conclusion,..)

Author's feedback:

All the above mentioned advices were corrected, furthermore, reference which is suggested by you was added as No.7 reference which is :

Arshah T, Al-Bakosh A, Ali MM, Ramadan HA, Alshawish SS, Algondy MA. Superficial Fungal Skin Infections in Patients Attending Zliten Teaching Hospital (North West of Libya). Int J of tropical disease & health.2016; 20(2): 1-8.

- All corrections were labeled with yellow colour.
