| <b>Compulsory</b> REVISION comments | The manuscript is within the scope of the journal. The work is relevant, original and will contribute to the scientific community. The writing is good, the methods very well detailed, few errors and showing care in the preparation. The presentation of the results, as well as the discussion and conclusions are adequate and consistent. Thus, the recommendation is to accept the manuscript. However, few corrections should be conducted to further improve the quality of the manuscript presented. The considerations are described below.                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
