PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		All the comments and suggestions by reviewers have been incorporated in the revised article. All the comments made by reviewers are highly satisfied and have been revised accordingly by the corresponding author.
Minor REVISION comments	Line 54: The author/s have to state the months as they mentioned in the abstract (A total of 1248 serum samples were collected during the period from July 2008 to December 2014 from cattle). Line 95: reported by [15, 16] respectively. Line123: There is a typing error for the percentage of prevalence, instead of (0.09%) it is (0.9%). Line 157 (reference 7) and Line 170 (ref. 12): The two references are duplicate, so the author/s should remove one and correct accordingly in the text (line 43 & line 89)	1, The month and year have been added. 2. The word respectively added 3. Percentage of 0.9% instead of 0.09% have been corrected. 4. One Reference was removed accordingly.
Optional/General comments	Line 48: It will be very good if the author/s can mention at least one reference and/or previous prevalence of Meghalaya. In general: the subject and findings of the current study are of interest for both animals and humans as one health approach in the future, therefore, this paper is suitable for publication in International Journal of Tropical Disease & Health.	1. One Reference 2016 of Meghalaya was added as per Reviewer instruction.
